**BORO
PHENE**

ONROAD

BOROPHENE

A layer of sophistication

Protection
Uncompromised.

Introducing

the revolutionary Borophene - Choose a permanent protective coating with just a single-layer application. Elevate your vehicle's shine and ensure it lasts.

BOROPHENE

The science of Sophistication

Graphene with its usual honeycomb structure is stiff, Borophene is more rigid in a different form where its atoms don't create those hollow hexagons of Graphene. The added advantage is that Borophene can also self-organize into layered structures using twin boundaries between its parts meaning it delivers an ultra-glossy appearance.

What's more? Borophene bonds stronger with the paint material giving you long-lasting gloss and finish.

BOROPHENE

Key features:

30%

More glossier than
Graphene coating

Permanent
Protection

180°

Water Contact Angle
(Super Hydrophobic)

Anti-Static Quality
(Prevents dust and debris
from settling on the surface)
